Projects

My Portfolio   *github.com/name/repo* ↗
- Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Router, Git, Vercel
- Engineered a fully responsive and interactive portfolio to showcase projects, technical skills, and resume with seamless navigation.
- Architected the app with reusable React components and a scalable file structure to ensure maintainability.
- Enhanced UI/UX with Tailwind CSS, custom animations, and accessibility best practices, improving engagement. Optimized site performance with lazy loading, SEO best practices, and mobile-first design, achieving fast load times.
- Deployed and version-controlled with Git and Vercel, ensuring continuous delivery and high availability.

TeamWriter – Google Docs Lite   *github.com/name/repo* ↗
- Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets, Quill.js, Socket.IO, Git, Vercel
- Built a real-time collaborative text editor inspired by Google Docs, enabling multiple users to edit documents simultaneously.
- Implemented WebSocket-based live synchronization with Socket.IO to broadcast changes instantly across connected clients.
- Architected a RESTful backend with Node.js and Express.js and persisted document states in MongoDB for version control.
- Deployed the app on Vercel with a scalable architecture and used Git/GitHub for version control and team collaboration.
